How to use your **AJA KONA LHe** with **Adobe Premiere Pro CS6**

Everything has been done on Windows 7 x64.
The Mac version has not been tested.

You will need 7 things:

1. The AJA KONA LHe, formerly known as XENA LHe (NOT the „KONA LHe Plus", for this there is native CS6-support)

2. Adobe Premiere Pro CS5.5
3. Adobe Premiere Pro CS6

4. "AJA Windows Retail Drivers 5.5.2 for Windows (64-bit)" (AJA_Retail_Drivers-5.5.2-x64.msi.zip)
5. "AJA Windows Plug-ins for Adobe 5.5.2" (AJA_Win_Adobe_Plugins-5.5.2-x64.msi.zip)
6. "AJA Drivers 10.3.0 for Windows (64-bit)" (AJA_Win_Drivers-10.3.0-x64.msi.zip)
7. "AJA Windows Plug-ins for Adobe CS6 Version 10.3.0" (AJA_Adobe_Win-10.3.0-x64.msi.zip)

After all the necessary files are downloaded, initially please uninstall all previous driver / plug-ins you have installed for this card already.

It is essential to ensure the correct order of the steps, as it will not work otherwise:

1. Install the "AJA Windows Retail Drivers 5.5.2 for Windows (64-bit)" without rebooting.
2. Install the "AJA Windows Plug-ins for Adobe 5.5.2".
3. Install the "AJA Drivers 10.3.0 for Windows (64-bit)" without rebooting.
4. Install the "AJA Windows Plug-ins for Adobe CS6 Version 10.3.0".
5. Uninstall the "AJA Drivers 10.3.0 for Windows (64-bit)" without rebooting.
6. Install the "AJA Windows Retail Drivers 5.5.2 for Windows (64-bit)" and do a reboot.

Now the Aja-plugin can be used under Premiere CS6, eg. to digitize videos. There is a small problem, however, because the CS6 plug is designed for the new 10.3.0 drivers (of which the KONA LHe is just not support) that rely on the newly contained Aja control panel for settings such as video input Audio input ... etc. In the CS6 plugin this cannot be configured directly and because we need to use the 5.5.2 driver, the Aja Control Panel is not available.

At this point, Premiere CS5.5 comes into play, as we still can make all the settings in the CS5.5 plugin from where they make their way to the settings of the CS6 plugin.

With regards,
The VIDEOSTATION® Support
