

AXIS Image Enhancer

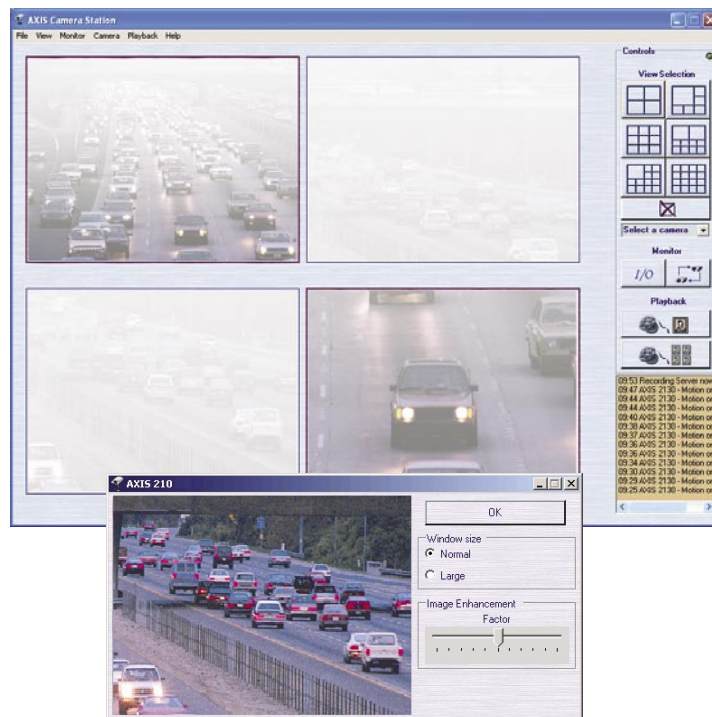

for AXIS Camera Station

*Improves image quality
in poor visibility*

AXIS Image Enhancer is an add-on software component for AXIS Camera Station that improves image quality in fog, smoke, rain and snow.

Live and recorded video streams affected by adverse weather conditions are improved using a mathematical algorithm that delivers real-time results far superior to simply adjusting brightness and contrast. Video is shown without distorting elements, which makes this the ideal solution for any situation where video quality can be affected by bad weather and crucial information can be lost.

AXIS Image Enhancer can be used to secure parking lots, harbors, airports, road tolls and other facilities where image clarity is needed for safe and smooth operations.

Example of how an image can be improved with
AXIS Image Enhancer.

- Improves image quality in fog, smoke, rain and snow
- Integrated into AXIS Cameras Station and activated with a license key
- For use with live video and recordings
- Ideal for outdoor cameras

AXIS Image Enhancer

Select a live or recorded video stream from AXIS Camera Station and improve the quality with AXIS Image Enhancer.

Product Features

- Ideal for outdoor cameras
- View and distinguish objects in fog, smoke, rain and snow
- Extend visibility in harbors, airports, roads and tunnels
- Use with live video and recordings
- Superior results compared with brightness/contrast adjustments

Product Specifications

- AXIS Image Enhancer requires AXIS Camera Station version 1.20 or higher.
- AXIS Image Enhancer is activated with a license key, no additional software installation required.
- One AXIS Image Enhancer license is required per video channel. License keys can be purchased in packages of 1 and 5.
- Supports all Axis color network video cameras and servers except MPEG-2 products.
- Optimal image enhancement is achieved on color video taken between dawn and dusk.
- AXIS Image Enhancer must be activated for enhancement of recorded images.

AXIS Camera Station

- View and record live video from multiple cameras from a remote location
- Record continuously, on alarm or on motion detection
- High-quality recordings
- No recording limitations in software
- Full duplex audio communication
- Multilingual user interface, help files and documentation
- Up to 25 cameras can use AXIS Camera Station simultaneously
- Available as 4 camera license, 10 camera license, 1 camera add-on license and 5 camera add-on license
