LogicKeyboard™ Avid Media Composer 4.0 / 5.0 Ultra Thin Alu Keyboard

**Shuttle Xpress is sold seperatly. Please see bundle options below.**

This custom keyboard for Avid Media Composer is based on the original Apple Ultra Thin Alu keyboard. It offers plug-and-play setup with any current or recent USB-equipped Macintosh computer, with good feel and stylish, modern appearance that match the "new Apple look".

The custom LogicKeyboard™ keyboard for Avid Media Composer makes controlling Media Composer with the keyboard a lot simpler and faster. It is ideal for post-production facilities, professional video editing houses and anyone else who requires all the custom key commands to readily accessible from a dedicated, clearly labeled, colour-coded keyboard. Using this keyboard is also a great way to learn the Avid Media Composer key commands.

And since the Avid Media Composer custom keyboard also features all the regular letter, number, and symbol labelling that you will find on a conventional keyboard, it can either be added to your computer in conjunction with your conventional keyboard or simply be used as a substitute for it.
