

FUSION™ 400

4-Bay Serial ATA Hot-Swap Drive Enclosure

Product shown without door

KEY FEATURES

- ▶ Four hot-swappable 3.5" drive trays
- ▶ SATA II compliant, 1.5 Gb/s and 3 Gb/s
- ▶ Supports all 3.5" Serial ATA drives
- ▶ Drive activity LEDs
- ▶ Built-in universal power supply
- ▶ Hot-swappable whisper-quiet fan for noise-sensitive environments
- ▶ Platform independent—works with Mac®, Windows® or Linux®
- ▶ Standards-approved eSATA connectors rated at 5,000 insertions
- ▶ Compatible with any Serial ATA host adapter including Sonnet's Tempo-X eSATA 4+4, Tempo SATA E4P and Tempo SATA X4P cards
- ▶ Supports RAID 0 (striping) and RAID 1 (mirroring) via Mac OS X and Windows XP

SATAsfaction in a Box!

Tired of external USB and FireWire® drives not stacking up when it comes to speed? Change your interface and think inside our box! Sonnet's new Fusion 400 4-bay Serial ATA (SATA) drive enclosure combines the versatility of hot-swap functionality with support for the fastest SATA drives in a seriously cool package. This box is built for speed—data passes straight from drive to SATA host controller with no "bridge chip" to slow the transfer, unlike FireWire and USB enclosures. Fusion 400 is compact, but its small footprint will make a big impression—with its powerful built-in universal power supply and compact dimensions, it is a great solution for anyone looking to store large amounts of data in a little package.

Accessories for Fusion 400

Part #	Contents
ENC-SATA-TRAY2	Spare drive tray for Fusion 400 and Fusion 500P

Maximum Flexibility

This enclosure supports 3 Gb/s drives and is backward compatible with 1.5 Gb/s drives, so you'll get maximum flexibility in choosing drives for years to come. The four hot-swap drive trays offer great freedom of choice in building your storage solution—you won't get locked into a specific configuration. Start out with a single drive for simple data storage and then add additional ones as the need arises, or fill the enclosure with four drives up to 500GB each to create a monster 2 terabyte striped RAID array for uncompressed HD video capture and editing—Fusion 400 is truly versatile. Need even more storage space? Pick up additional trays so you can add drives to your arsenal for daily backups or project management.

Attention to Detail

Fusion 400 was designed with form and function in equal balance. The drive trays have built-in levers that double as handles to make swapping drives easy, and the cable-less connections from drives to enclosure simplify setup and assure reliability over the long haul. Each drive tray can be locked independently of the others, so you can control the level of security for each installed drive. In the unlikely event you need to replace the whisper-quiet fan, there's no need to shut down—it's hot-swappable, too.

SPECIFICATIONS

Compatibility	Compatible with Mac, Windows, and Linux computers with compatible SATA controller
External Connectors	Four eSATA
Drives Supported	1.5 & 3 Gb per second Serial ATA; up to 10,000 RPM
Data Transfer Speed	Up to 300MB per second per drive
OS Support	Platform Independent
Power Supply	90-260v Universal
Operating Temperature	+5°C to +55°C
Dimensions	7.5 x 5.875 x 11.25" (190.5 x 149.22 x 285.75mm)
Weight	9.35 lbs
Package Contents	Disk enclosure, four 3.5" drive trays, drive tray keys, drive mounting screws, power cord, four 1 meter eSATA data cables, User's Guide
Warranty	3-year limited warranty

Part No: ENC-SATA-D4 (North America)

ENC-SATA-D4-A (Australia)

ENC-SATA-D4-E (Europe)

ENC-SATA-D4-J (Japan)

ENC-SATA-D4-U (United Kingdom, Singapore, Malaysia)
