

VocALign Project

Affordable Audio Alignment for Music and Post Production

FEATURES

- VocALign Project takes just seconds to automatically align two audio signals so that the timing of one matches the other
- Simple, intuitive operation and Audio Suite integration with Pro Tools
- Sophisticated pattern matching techniques that reject guide track noise and work with different speakers, singers, words, instruments and sounds
- Works with 16- and 24-bit audio
- The aligned audio can be auditioned within VocALign Project
- User interface allows adjustment of selected audio regions for processing, and the scrolling, scalable display allows visual confirmation of sync
- User-adjustable processing presets ensure optimal performance
- Pitch of aligned audio is unchanged

VocALign's unique ability to align two signals enables it to be used creatively to take guide or even "live" tracks and create performances with perfectly aligned overdubs. This Audio Suite™ plug-in gives Pro Tools® users perfectly aligned double-tracked vocals, tight backing vocals, easy re-grooving of recorded vocals for remixing and shorter overdub sessions. Users also have the ability to choose the best rhythm and pace for a specific vocal, or even lay down the required tempo pattern for the artist.

For postproduction, VocALign will automatically edit a line of replacement dialog so that it aligns with the dialog recorded with the original film or video. The artist can concentrate on performance and the result is perfectly lip-sync'd dialog, or more convincing foreign language dubs and reduced studio time re-recording the dialog.

VocALign is a truly amazing tool, which reduces the time taken to re-record dialog or vocals — saving money by drastically reducing production and studio time. Artists can now concentrate on performance and not sync during overdubbing sessions.

"VocALign is indispensable to me."

— Desmond Child, Producer: Ricky Martin, 2Be3, Jason Raize

"VocALign is definitely my favourite ADR tool"

— Mike Hopkins, Dialog Supervisor: "Lord of the Rings," "Heaven," "The Frighteners"

Synchro Arts has been providing innovative audio processing software since 1994. The main focus of Synchro Arts' products has traditionally been the music and post-production industries, providing the ever-popular VocALign and TITAN products to a range of users worldwide. Recently, the technology which powers VocALign has been used to develop "ReVoice Studio," first seen on the DVD Release of Dreamworks' "Shrek"™ movie.
