

# CHECK IT SYSTEM PERFORMANCE SUITE

**CheckIt® System Performance Suite is perfect for those who can't afford to lose important files or want to prevent down-time from hardware problems!** Maintain your Mac at peak performance while ensuring that your critical files are backed up and protected! With three of the industry's top utilities at one great price, CheckIt is the solution to reach for when things go wrong on your Mac!

**CheckIt System Performance Suite brings three complete utilities together in one powerful package!**

- **Spring Cleaning® 8.0**, a powerful "uninstaller" and cleanup utility designed to help users rid their computer of unnecessary and redundant files
- **TechTool® Platinum**, a full-featured version of Micromat, Inc.'s leading diagnostic and repair tool
- **EMC Retrospect Express™**, flexible and intuitive personal backup and restore software.

## SPRING CLEANING

With powerful new features including the ability to gather photos and music files, folder synchronization, Widget Finder, and other features, Spring Cleaning helps take the guesswork out of managing files on your Macintosh. When it comes to locating and collecting media files, or removing outdated, orphaned, or redundant files, there is no tool more powerful than Spring Cleaning 8.0!

- **SIZEMANAGER** shows the size of each item in graphical form, so you can zoom in on problems!
- **DUPLICATES FINDER** locates duplicate files and folders that you may not need and erase them!
- **QUICKCOMPARE** Lets you view files, folders and applications side by side to spot their differences.
- **SYSTEM SNAPSHOT** Highlights all the changes made to your Mac! Track them against a baseline you set, or compare after every software installation!
- **INTERNET FILE FINDER™** Lets you pick and choose which cookies you want to keep, cleans your browser history and cache!
- **SECURE DELETE™** Guarantee that sensitive files are gone for good with this ultimate digital shredder!

## TECHTOOL PLATINUM

TechTool Platinum truly is the next generation disk utility for the Macintosh. Whether you're looking to optimize a drive, repair its directory structure, recover lost or trashed files, or just gain the peace of mind of knowing your drive is in good shape, TechTool Platinum is the tool to reach for! TechTool's eDrive feature lets you recover from technical problems without having to carry around system CDs!

- **eDRIVE** is a bootable OS X emergency partition on your hard drive, containing TechTool Platinum and a small copy of your system! Boot your Mac and run TechTool right away!
- **BOOTABLE CD** create a bootable CD for your Mac containing an optimized version of the system and TechTool, and gain immediate access to Tech Tool's repair abilities!
- **S.M.A.R.T. TESTS** Thoroughly check various hardware components, drives, and other aspects

Monitor, test, repair and defragment your hard drives for greater speed and efficiency!
