

# PROFESSIONAL HD/SD-SDI SWITCH

For only £399 or €575

## Introducing nanoSwitch 4-In → 2-Out HD/SD-SDI Switch

New!

### Great as an Editing System or Display Input Switch

### Professional Design

An SDI reclocker is used to lower the jitter and maximise the input and output cable lengths.

### Broad Format Support

143 Mps, 270 Mbps, 1.483 Gbps and 1.485 Gbps are supported. This supports the standard video formats including standard definition (486i and 576i) and high definition (720p, 1080i, 1080p24, 25, 30).

### Local or Remote Control

The desired input can be selected with a button on the nanoSwitch or remotely using USB.

### Low Power, Small Footprint

1.4 W, Size: 5 x 4 x 1 inches  
Power Supply Included.

### 2 Identical Outputs from the Selected Input

**Available Q3 2007**
